AWS Glue ETL Pipeline with Amazon S3

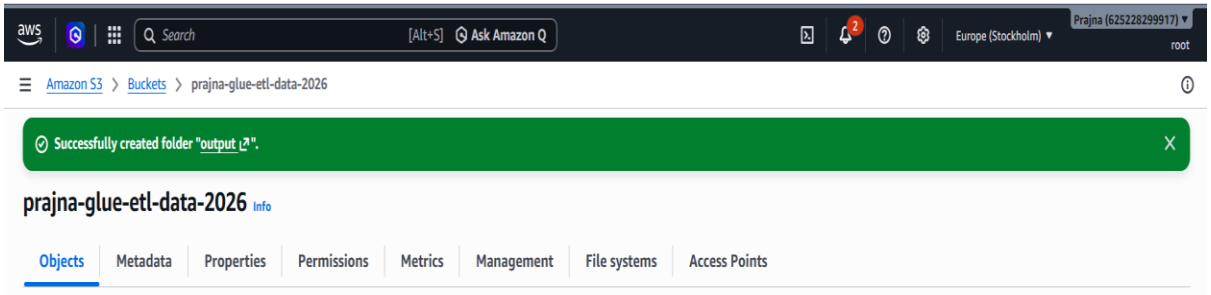

1) Creation of Amazon S3 Bucket

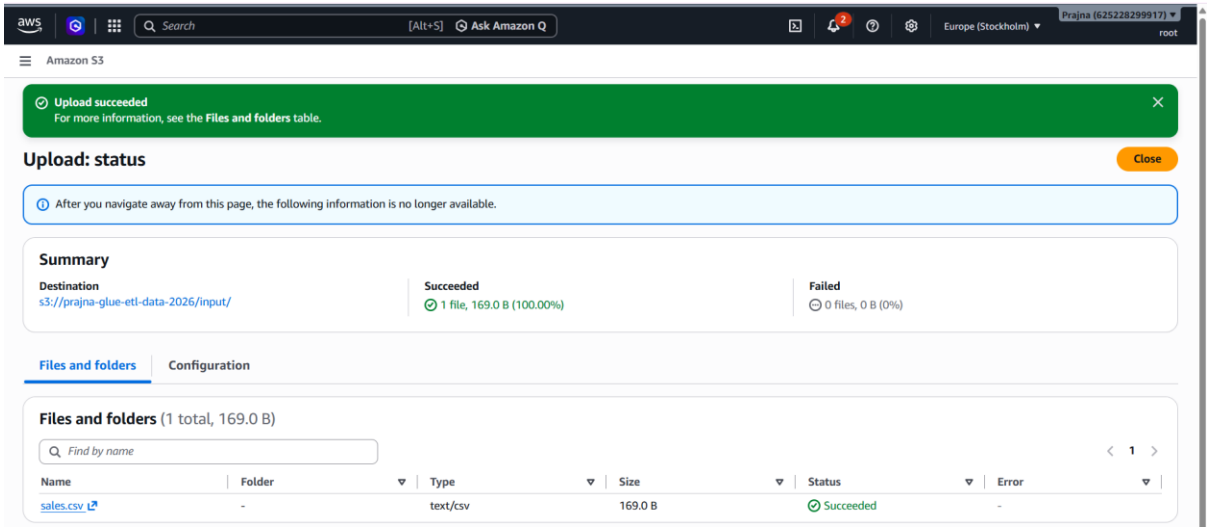

2) Creation of Input Folder in S3 Bucket

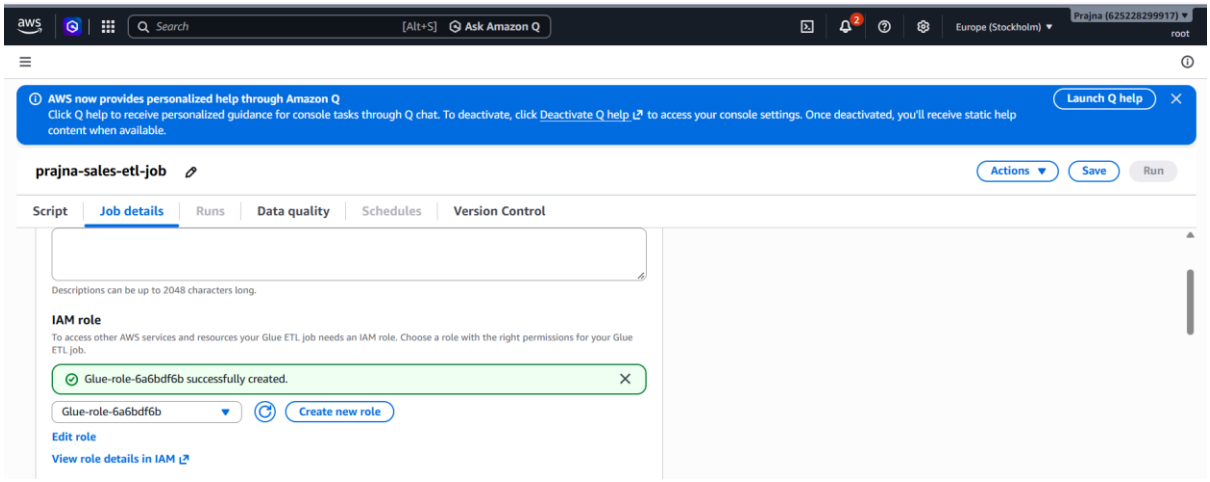

3) Creation of Output Folder in S3 Bucket

4) Successful Upload of `sales.csv` to the S3 Input Folder

5) Creation of AWS Glue ETL Job and IAM Role Configuration

6)AWS Glue Job Creation Error – Account Access Denied

The screenshot shows that AWS returned an `AccessDeniedException` while creating the Glue job. This may be related to an account-level restriction or permissions
